Index Data (Source : Amundi)

Description of the Index

The index tracks the investment performance of a systematic strategy whose returns are directly linked to changes in the US treasury yield curve. The index is constructed such that for a 1bp increase in the steepness of the curve, the index is expected to increase roughly 7bps, though market factors may cause some deviation. The index consists of two underlying components: a long position in the 2Y US Treasury Bond Futures and a short position in the 10Y US Treasury Ultra Bond Futures. Further index details and methodology may be found at www.solactive.com.
