What is this product?

Type: Shares of a Sub-Fund of Amundi Index Solutions, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Sub-Fund is an index-tracking UCITS passively managed. The objective of this Sub-Fund is to track the performance of the MDAX ESG+ (NR) EUR Index (the "**Index**"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index.

The Sub-Fund aims to achieve a level of tracking error that will not normally exceed 1%.

The Index is a Net Total Return Index: dividends net of tax paid by the Index constituents are included in the Index return.

The Index is an equity index based on the MDAX Index (the "**Parent Index**") representative of medium capitalization companies (mid-caps) in Germany from traditional sectors, including media, chemical, industry, and financial services and technology that follow the companies included in the MDAX in terms of market capitalization and order book turnover. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score.

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance ("ESG") rating. The Index methodology is constructed using a "Best-in-class approach": best ranked companies are selected to construct the Index.

Limits of the methodology of the Index are described in the prospectus of the Sub-Fund through risk factors, such as sustainable Investment Risk.

More information about the composition of the Index and its operating rules are available in the prospectus and at: www.stoxx.com

The Index value is available via Bloomberg (MDXESGPN).

The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely

close to their proportion in the index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and also if it allows a better exposition to an Index constituent. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges, provided that the Market Makers can maintain market liquidity. Only authorised participants (e.g. selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the prospectus of the UCITS.

Updated composition of the Sub-Fund holdings is available on www.amundietf.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Sub-Fund, and might also be mentioned on the websites of the stock exchanges where the Sub-Fund is listed.
