Important information for Investors

Parties entering into transactions (such as a derivative or financing transaction) or investing in financial instruments that use an index or a variable interest rate (benchmark) are exposed to the risk that:

- (1) such benchmark may be subject to methodological or other changes which could affect the value of the relevant transaction; or
- (2) (i) may become not compliant with applicable laws and regulations (such as the European Benchmark Regulation), (ii) may cease to be published (possible cessation of LIBOR publication or planned cessation of EONIA both after December 2021), or (iii) the supervisor or administrator of any such benchmark may make a statement that the relevant benchmark is no longer representative, and as a consequence the relevant benchmark may be replaced by another benchmark which may have an adverse and material impact on the economics of the relevant transactions.

You should conduct your own independent investigation and analysis of the potential consequences of any relevant risks such as those mentioned above, particularly in light of the ongoing industry initiatives related to the development of alternative reference rates and the update of the relevant market standard documentation.

Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on www.lyxoretf.com

CAPITAL AT RISK: ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

REPLICATION RISK: The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

COUNTERPARTY RISK: Investors are exposed to risks resulting from the use of an OTC Swap with Societe Generale. In-line with UCITS guidelines, the exposure to Societe Generale cannot exceed 10% of the total fund assets. Physically replicated ETFs may have counterparty risk resulting from the use of a Securities Lending Programme.

UNDERLYING RISK: The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

CURRENCY RISK: ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

LIQUIDITY RISK: Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.

Investor's Notice

**The Total Expense Ratio (TER) covers all costs incurred by the Management Company to manage the underlying assets. It comprises a Management Fee and Structural Costs described as follows. The Management Fee represents the compensation for the Management Company services. The Structural Costs represent the custodian fee, the administrative fee, the audit fee and all other operating costs that will be paid by the Management Company to operate the funds.

It is each investor's responsibility to ascertain that it is authorised to subscribe, or invest into this product.

Prior to investing in the product, investors should seek independent financial, tax, accounting and legal advice.

Lyxor MSCI Brazil UCITS ETF is an investment company with Variable Capital (SICAV) incorporated under Luxembourg Law, listed on the official list of Undertakings for Collective Investment, authorised under Part I of the Luxembourg Law of 17th December 2010 (the "2010 Law") on Undertakings for Collective Investment in accordance with provisions of the Directive 2009/65/EC (the "2009 Directive") and subject to the supervision of the Commission de Surveillance du Secteur Financier (CSSF).

The product is a sub-fund of Lyxor MSCI Brazil UCITS ETF and has been approved by the CSSF and has been notified to the AMF to be marketed in France.

Societe Generale and Lyxor International Asset Management S.A.S. recommend that investors read carefully the "risk factors" section of the product's prospectus and the "Risk and reward" section of the Key Investor Information Document (KIID). The prospectus in English and the KIID in French are available free of charge on www.lyxoretf.com or upon request to client-services-etf@lyxor.com.

The attention of investors is drawn to the fact that, the prospectus is only available in English.

Units of a specific UCITS ETF managed by an asset manager and purchased on the secondary market cannot usually be sold directly back to the asset manager itself. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them.

Updated composition of the product's investment portfolio is available on www.lyxoretf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the product, and might also be mentioned on the websites of the stock exchanges where the product is listed.

There is no guarantee that the fund's objective will be met. The fund may not always be able to replicate exactly the performance of the index (or indices).

This product includes a risk of capital loss. The redemption value of this product may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment.
