What is this product?

Type: Shares of a Sub-Fund of Lyxor Index Fund, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Fund is an index-tracking UCITS passively managed.
The investment objective of the Fund is to track both the upward and the downward evolution of the MSCI EMU Value Net Return EUR Index (net dividends reinvested) (the "Benchmark Index"), denominated in euros (EUR) and representative of large cap value' securities across developed countries in European Economic and Monetary Union (EMU), while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error").
The anticipated level of tracking error in normal market conditions is indicated in the prospectus.
The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.
MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes.
The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Benchmark Index.
To optimize the Benchmark Index replication, the Fund may use a sampling replication strategy, and may also engaged in securities lending transactions.
The potential use of these techniques is published on Lyxor's website: www.lyxoretf.com.
Updated composition of the Fund holdings is available on www.lyxoretf.com.
In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.
The Fund is eligible to the French Equity Saving Scheme (PEA), and as consequence, a minimum of 75% of the Fund assets are invested in diversified equities issued in the European Union.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment and to receive income over the recommended holding period and who are prepared to take on a high level of risk to their original capital.

Redemption and Dealing: The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the Lyxor Index Fund prospectus.

Distribution policy: The Fund’s amounts available for distribution (if any) will be distributed.

More Information: You may get further information about the Sub-Fund, including the prospectus, and financial reports which are available at and free of charge on request from: Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France.
The Net Asset Value of the Sub-Fund is available on www.amundi.lu.

Depositary: Societe Generale Luxembourg.

What are the risks and what could I get in return?

RISK INDICATOR

Lower Risk Higher Risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Lyxor Index Fund prospectus.

What happens if Amundi Asset Management is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of Lyxor Index Fund. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.
