\* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

## Description of the Index

The Index is constructed from the Bloomberg Euro Corporate Index (the "Parent Index") and intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB label, as further described in Appendix I – ESG Related Disclosures to the funds' Prospectus. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.
