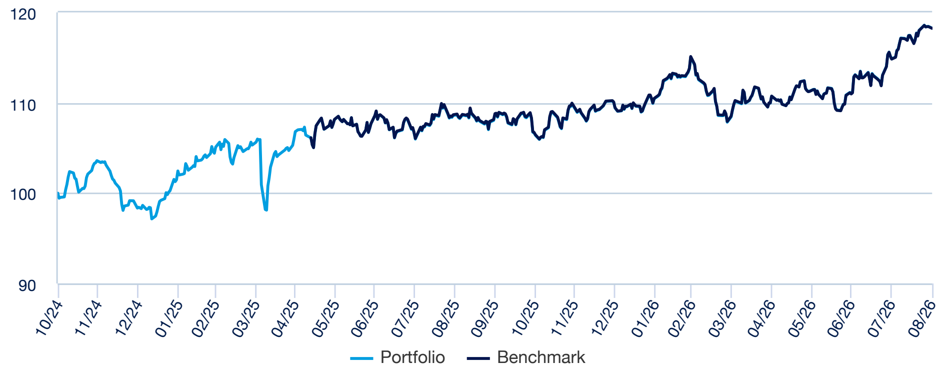
31/08/2026

EQUITY

Objective and Investment Policy

The Sub-Fund is passively managed. The objective of the Sub-Fund is to track the performance of the index “MSCI World Minimum Volatility Advanced Target Index“ (the “Index”). The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is an equity index based on the MSCI World Index, representative of the large and mid-cap stocks across developed markets countries (the “Parent Index”). The Index is designed to represent the performance of a strategy that seeks systematic integration of environmental, social and governance (“ESG”) characteristics along with the minimum volatility factor (i.e. stocks which exhibit less price variability than the broad market). The index is constructed by selecting constituents of a market capitalization weighted index and applying an optimization process that aims to minimize the total risk, reduce the carbon-equivalent exposure to CO2 and other greenhouse gases (“GHG”) by thirty percent (30%) and improve the weighted-average industry-adjusted ESG score of the index with respect to its Parent Index. The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return. For further details, please refer to the Index methodology available on msci.com. The limits of the approach adopted are described in the Sub-Fund's prospectus through ESG Risks factors such as Risk linked to ESG Methodologies and to ESG score computation. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete. The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

Performances from 30/10/2024 to 31/08/2026 (Source : Fund Admin)



Risk indicators (Source: Fund Admin)

	1 year	Inception to date *
Portfolio volatility *	8.20%	9.36%
Benchmark volatility	8.24%	9.42%
Ex-post Tracking Error	0.10%	0.11%
Sharpe ratio	0.63	0.62

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.
The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Cumulative returns* (Source: Fund Admin)

** Source : Amundi. The above cover complete periods of 12 months for each calendar year.* ***Past performance is no predictor of current and future results and does not guarantee future yield*** *. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Risk Indicator ***(Source : Fund Admin)***

1 2 **3** 4 5 6 7

Lower Risk Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the AMUNDI ETF ICAV prospectus.
