## Objective and Investment Policy

This Sub-Fund is passively managed. The objective of this Sub-Fund is to track the performance of Bloomberg BioEnergy Screened Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index : dividends net of tax paid by the Index constituents are included in the Index return. The Index is constructed to track the performance of companies that are expected to generate a meaningful portion of revenue from the production, storage, and distribution of ethanol, biodiesel, and renewable fuel. In addition, securities must meet certain minimum Environmental, Social or Governance ("ESG") standards. The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an ESG rating. The Index methodology is constructed using a "best performer approach": relying on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company that must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. Factors identified as material result in a contribution of more than 10% to the overall ESG score. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics. The limits of the approach adopted are described in the Sub-Fund's prospectus through risk factors such as Sustainable investment risk. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete. Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed. More information about the composition of the Index and its operating rules are available in the prospectus and at: [bloomberg.com](http://bloomberg.com) The Index value is available via Bloomberg (BBIOEN). The Sub-Fund will apply a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index. In order to deal with inflows and outflows and some local market specificities: the Investment Manager will be able to combine the direct replication with a replication through derivatives such as amongst other futures. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and also if it allows a better exposition to an Index constituent. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

## Performances from 30/09/2016 to 30/09/2026 (Source : Fund Admin)

## Risk indicators (Source: Fund Admin)

|                               | 1 year | 3 years | Inception to date * |
|-------------------------------|--------|---------|---------------------|
| <b>Portfolio volatility *</b> | 17.90% | 16.88%  | 23.33%              |
| <b>Benchmark volatility</b>   | 17.93% | 16.90%  | 23.33%              |
| <b>Ex-post Tracking Error</b> | 0.17%  | 0.20%   | 0.09%               |
| <b>Sharpe ratio</b>           | 2.81   | 0.52    | 0.26                |

\* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

| <b>Benchmark</b> | 8.93% | -14.95% | -2.63% | 55.58% | 50.73% | -37.12% | 13.50% | -11.59% | -7.80% | 30.35% |
| <b>Spread</b>    | 0.20% | 0.23%   | -0.19% | -0.48% | -0.87% | -0.37%  | -0.64% | -0.21%  | -0.48% | -0.46% |

\* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

## EQUITY

## Risk Indicator (Source : Fund Admin)

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Index Solutions prospectus.
