What is this product?

Type: Shares in a Sub-Fund of the Amundi Multi-Asset Portfolio, an undertaking for collective investment in transferable securities (UCITS), established as an investment fund.

Term: The Sub-fund has an unlimited term. We are entitled to terminate the management of the Fund via an announcement in the Federal Gazette (Bundesanzeiger) and also in the annual or semi-annual report.

We may suspend the redemption of units if exceptional circumstances so require, taking into account the interests of investors.

Objectives: The Sub-fund is an actively managed UCITS and does not refer to a benchmark. The investment objective of the Sub-fund is to provide long-term value growth to shareholders by investing in a broadly diversified ETF portfolio. The Sub-fund is primarily acquired through passively managed exchange-traded investment funds or investment companies (the "ETFs") that replicate the performance of market international equity, bond, money market and/or commodity indices or interest rates. An annual reset to the initial weightings ("rebalancing") in March each year ensures that no portfolio component receives a disproportionate weight over time in relation to the target allocation (the "asset strategy").

In order to achieve the investment objective, target funds are acquired that track the performance of international equity indices and/or money market and/or market-standard financial indices as well as the performance of commodities (e.g. Dow Jones UBS Commodity Index). The initial allocation consists of the following asset classes: 60% equities spread geographically and across sectors (15% North American equities, 10% Asia-Pacific equities, 15% European equities, 5% blue-chip equities, 10% emerging market equities, 5% German small-value equities), and 30% bonds (10% European government bonds, 10% German covered bonds, 10% US market bonds), which replicate both government bond and covered bonds indices. In addition, there are 10% commodity investments, which are replicated via an ETF with reference to a diversified basket of commodity indices.

The allocation of funds is based on the objective of investing in a broadly diversified portfolio of assets. This proportional allocation is restored once a year so that strong performance in a component does not lead to a high overweighting in the medium term, or a low performance will have an underweighting effect over the initial allocation. If the equity ratio is exceeded or undershot by more than 5 percent, a re-weighting to the aforementioned ratios can also take place during the year. The investment policy may also be complemented by the use of ETCs or other securities that replicate market-standard financial indices or interest rates.

At least 51 percent of the value of the Sub-fund is invested in equity investments as defined by § 2 (8) Investment Tax Act. Equity investments in this sense are shares in other investment assets either in the amount of the share of their value published on the valuation date at which they actually invest in the aforementioned shares in corporations or in the amount of the minimum ratio stipulated in the investment conditions of the other investment assets.

Intended retail investors: This product is intended for investors who have basic knowledge and no or limited experience of investing in funds and who are able to absorb losses up to the investment amount.

Redemption and dealing: The shares of the Sub-fund are listed and traded on at least one stock exchange. Under normal circumstances, you may trade shares during stock exchange trading hours. Only eligible participants (e.g. selected financial institutions) can trade shares directly with the Management Company via the Sub-fund on the primary market. For further details, please refer to the Amundi Multi-Asset Portfolio prospectus.

Distribution policy: The Sub-fund income is ordinarily distributed.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is medium-low risk class. The risk of potential losses from future performance is therefore classified as medium-low. In very unfavourable market conditions, it is unlikely that the ability to execute your redemption requests will be compromised.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Further information can be found in the prospectus or the investor information document of the Amundi Multi-Asset Portfolio.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Sub-fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What happens if Amundi Luxembourg S.A. is unable to pay out?

A separate pool of assets is created and maintained for each Sub-fund of the Amundi Multi-Asset Portfolio. The assets and liabilities of the Sub-fund are separate from those of other Sub-funds and from those of the Management Company and there is no mutual liability. The Sub-fund shall not be liable if the Management Company or a contracted service provider fails or falls into arrears.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you keep the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

Example investment EUR 10,000

Scenarios	If you exit after	
	1 year	5 years*
Total costs	€43	€293
Annual Cost Impact**	0.4%	0.5%

* Recommended holding period

* This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is projected to be 6.49% before costs and 6.03% after costs.

We do not charge an issue premium.

If you are invested in this product as part of an insurance contract, the costs shown do not include additional costs that you could potentially bear.

* Secondary market: Since the Fund is an exchange-traded fund, investors who are not eligible participants can generally only buy or sell shares on the secondary market. Accordingly, investors pay brokerage fees and/or transaction costs in connection with their transactions on the stock exchange(s). These brokerage fees and/or transaction costs are not levied by the Fund or the Management Company and are not payable to them, but to the investor's intermediary. In addition, investors can also bear the costs of the bid-ask margins, i.e. the difference between the prices at which shares can be bought and sold.

Primary market: Eligible participants trading directly with the Fund will pay the corresponding primary market transaction costs.

How long should I hold it and can I take money out early?

Recommended holding period: Five years, based on our assessment of the risk and reward characteristics and costs of the Sub-fund. This product is designed for medium-term investment. You should be willing to remain invested for at least five years. You can redeem your investment at any time, or hold the investment longer.

Order schedule: See "What is this product?" for details on the trading frequency. Please refer to the "What are the costs?" section regarding any exit costs.

The Company may suspend the subscription and redemption of units/shares if exceptional circumstances so require, taking into account the interests of investors. To manage liquidity risks, the Company may restrict the redemption of units/shares if investor redemption requests reach a predefined threshold beyond which such requests can no longer be executed in the best interests of all investors. The Company may also impose an anti-dilution levy, a method by which the costs arising from subscriptions and/or redemptions (e.g. transaction costs) are allocated to investors on a cost-attribution basis, thereby reducing the risk of dilution for the investors remaining in the Fund. The Company may separate illiquid assets in the interests of investors. Further details can be found in the prospectus.
