What is this product?

Type: Shares of a Sub-Fund of Amundi Index Solutions, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: This Sub-Fund is passively managed.

The objective of this Sub-Fund is to track the performance of EURO STOXX 50 Covered Call Target Income 8% (the "Index") and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund.

The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return.

The EURO STOXX 50 Covered Call Target Income 8% Index ("The Reference Index") measures the performance of a systematic, partial at-the-money covered call strategy. The strategy consists of having a long exposure to EURO STOXX 50 Net Total Return Index and a short exposure to a succession of monthly, at-the-money, call options of the EURO STOXX 50 Option ("The Underlying Index").

This approach aims to generate a target 8% annual income collected through options premiums, while limiting upside participation if the index level rises above the strike price. In the event that the index level declines, the premium received might partially help offset the loss.

To achieve this target 8% annual income, the quantity of option sold, each month, ("Coverage ratio") is adjusted depending on the value of the options. As a result, call options may be written on only a portion of the total notional exposure. This would mean, gains on the covered portion by the written call options are limited to the applicable strike price, while the remaining uncovered exposure continues to participate fully in gains above the strike price.

More information about the composition of the Index and its operating rules are available in the prospectus and at: www.stoxx.com. The Index value is available via Bloomberg (XXX).

The Sub-Fund will apply an Indirect Replication methodology to get exposition to the Index. The Sub-Fund will invest into a total return swap (financial derivative instrument) delivering the performance of the Index against the performance of the assets held. Derivatives are integral to the Sub-Fund's investment strategies.

Intended Retail Investor: This product is intended for investors, with an average knowledge of and some experience of investing in funds, seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the Amundi Index Solutions prospectus.

Distribution policy: The Fund's amounts available for distribution (if any) will be distributed.

More Information: You may get further information about the Sub-Fund, including the prospectus, and financial reports which are available at and free of charge on request from: Amundi Luxembourg S.A. at 5, allée Scheffer 2520 Luxembourg, Luxembourg.
