Objective and Investment Policy

The fund is a passively managed index-based UCITS. The Fund's objective is to replicate, both upwards and downwards, the performance of the DOW JONES INDUSTRIAL AVERAGE Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in USD and representative of the market performance of 30 large US companies in various sectors, excluding transportation and utilities, while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the tracking error under normal market conditions is indicated in the Fund prospectus. Additional information on the Benchmark is available at https://us.spindices.com/. The Fund aims to achieve its objective by means of indirect replication, namely by entering into one or more OTC swaps (financial futures instruments, "FFIs"). The Fund may invest in a diversified portfolio of international shares whose performance will be exchanged against that of the Benchmark through FFIs. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundietf.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.
